SUMMARY

Coming from a career in entertainment, marketing, and social media, I found myself constantly pulled toward the technical aspects of those fields—which ultimately led to the decision to pursue life as a programmer. As a passionate problem-solver, my love of puzzles and aptitude for design are maximized through application development.

EMPLOYMENT

Valencia College – School of Arts & Ent., Orlando, FL 09 / 2015 – 08 / 2021

Network Admin + Helpdesk

Tech Stack: Apple Remote Desktop, VirtualBox, Docker, Apple Automator, Dante Domain Manager, various DAWs

Role: Led a team of laboratory assistants working in on-campus recording and dubbing studios and performed day-to-day administration and maintenance on mission-critical systems including professional audio and IHSE KVM hardware and software. Oversaw the rollout of the largest educational Dante RedNet network in North America. Spearheaded an initiative to implement proprietary Dante Domain Manager software which utilized a Dockerized NTP server and remote logging to create and manage virtual audio subnet environments for on-campus recording studios. Increased knowledge base for help desk staff by authoring documentation for system configuration and troubleshooting. Provided consistent support via on-call rotation duty.

Super Sound, LLC., Orlando, FL. 01 / 2013 – 03 / 2020
